

As Architects and Interior Designers we were entrusted by High Liner foods to provide the best possible design for their new Head Quarters in Portsmouth NH. We needed to coordinate between the Developer and their General Contractor- Sullivan Construction

Sullivan Construction was a true team player and partner from kick off to move in. Not only did Sullivan Construction have a fabulous team who were professional and took pride in their work but also were very aware of schedule and costs. The project was completed on time and within budget.

The space is inspiring and functional. Every employee of High Liner foods raves about their new workspace.

This was a Design Build project therefore Sullivan Construction needed to ensure all trades were coordinated and flawlessly made High Liner's design and vision a reality.

It was truly a pleasure working with Sullivan Construction and we would certainly recommend them.
