Tom Sullivan  
Sullivan Construction  
258 South River Road  
Bedford, NH 03110

To whom it may concern:

We had the good fortune to work with Sullivan Construction on several projects over the last 8 years. The first project, in 2008, involved fitting out a new space from a shell in a new building. This space was about 17,000 ft sq.

The second major project involved completely renovating an 11,000 sq ft, existing building in 2013 and the last, in 2014, involved changing approximately 1,500 sq ft of space in the first building mentioned. I was the project head of the 2nd two renovations. Not only did I find the group of individuals at Sullivan to be professional and timely, but they also went out of their way to make sure that I was 100% satisfied with the work they did. They were also extremely conscientious to the noise level during the last renovation which took place during normal working hours while we were seeing patients. The project manager and the onsite construction manager were always available either by cell phone or email to answer any questions or concerns I might have had.

Not only do I highly recommend them but would also use them again for any future construction projects.

I am available and willing to answer any questions about our projects.

Warren Goldblatt, MD
